## Flow-Liner® Premier Products

### Flow-Liner® Start-Up Package Sewer & Drain Pipe Lining System

- Flow-120™ Inverter
- Portable wet-out system
- Includes 2", 3", 4", and 6" Inversion Heads
- Portable air compressor, air tank, and fittings
- Extension tubes for hard to reach installation sites
- 2 day hands-on training, operations and field manual
- Portable, compact, and light weight design

The Flow-Liner® Start-Up Package is a Cured-in-Place-Pipe lining inversion system. This sewer and drain pipe lining system utilizes ambient curing. Its capabilities include installing from only one access point and lining multiple bends. Optional equipment for steam cure package available. Contact a Flow-Liner® representative for more information.

### Need more than the Start-Up Package?

The Flow-Liner® Trailer system is the most inclusive affordable lining trailer available. Request a PDS for more information.

Any Trailer or Inversion system is now  
compatible with  
*Flow-Liner® HVAC!*

Just buy Specialized Liner and Epoxy to  
start your underground CIP-Duct™ Lining!

## Premium Flow-Liner® Add-ons

### Neofit®+Plus Potable Water Pipe Lining System

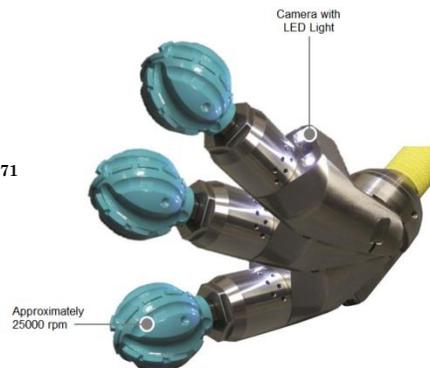

Neofit®+ Plus is a non-invasive pipe lining system designed for small diameter potable water service piping. The Neofit®+ Plus liner seals small leaks and pinholes in 1/2" thru 2" ID service piping. It also acts as a barrier between existing lead piping and potable drinking water. The Neofit®+ Plus liner is NSF-61G and NSF-372 approved and has been tested to a minimum 50+ year life expectancy.

U.S. Patent No. 8,807,171

### Flow-Liner® Cutter

The Flow-Liner® Cutter is a robotic lining reinstatement cutter especially designed for 3" to 5" ID lined pipes. It is capable of maneuvering around 90 degree bends with ease in 3" to 5" ID lined pipes. With its LED lighting and control unit with color camera, the Flow-Liner® Cutter is the perfect tool for reinstating branch lines. The basic unit comes with the necessary nitrogen hookup and assembly.
